

Early Warning and Reporting System (EWARS)

Weekly Bulletin

(15th Epidemiological Week)

22 April 2018

Government of Nepal
Ministry of Health and Population
Department of Health Services
Epidemiology and Disease Control Division
Kathmandu, Nepal
ewarsedcd@gmail.com

This bulletin includes the updates from the Early Warning Reporting System (EWARS). It includes data since January 2018 till date, including comparison of same period during last year.

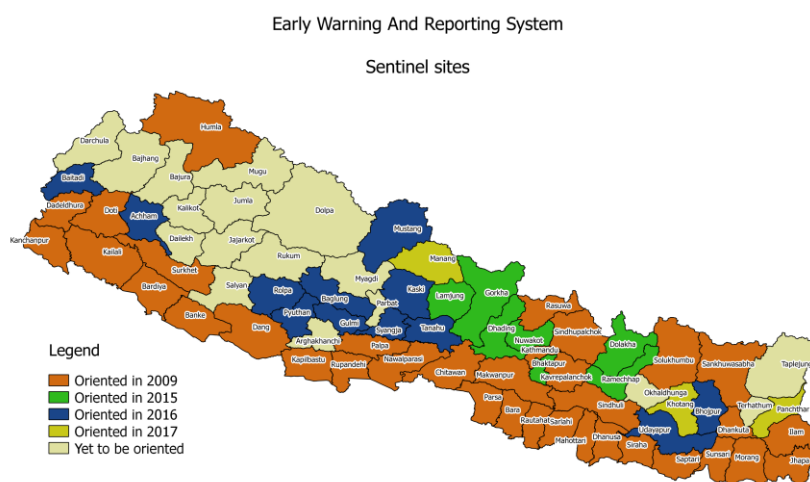

Section 1: The Early Warning and Reporting System (EWARS)

Highlights

- **Kala-azar:** Five cases of Kala-azar are reported this week, 3 from BPKIHS, Dharan and one each from Koshi Zonal Hospital, Morang and United Mission Hospital, Palpa. The cases are from Jhapa, Saptari, Bhojpur, Morang and Palpa district.
- **Malaria:** No case of Malaria is reported this week.
- **Dengue:** No case of Dengue is reported this week.
- **SARI:** One death from SARI is reported this week from Lumbini Zonal Hospital, Rupandehi and the deceased was from Sainamaina Municipality of Rupandehi district.
- **AGE:** One death from AGE is reported this week from Koshi Zonal Hospital and the deceased was from Morang district.
- **Scrub Typhus:** One Case of Scrub Typhus is reported this week from United Mission Hospital, Palpa and the case is from Mathagadhi Rural Municipality of Palpa district.

The EWARS was established in 1997 to strengthen the flow of information on vector-borne and other outbreak prone infectious diseases from the district to Epidemiology and Disease Control Division (EDCD) and Vector-Borne Disease Research and Training Center (VBDRTC), Hetauda. Rapid Response Teams (RRTs) can be mobilized at short notice to facilitate prompt outbreak response at Central, Regional and District level. RRTs can also support local level health institutions for investigation and outbreak control activities.

This information system is hospital-based and is currently operational in 66 hospitals (out of 82 sites) throughout Nepal (Figure 1). So far, the EWARS mainly focuses on the **weekly reporting** of number of cases and deaths (including "zero" reports) of six priority diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI), and other epidemic potential diseases/syndromes (like enteric fever). It equally focuses on **immediate reporting** (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more cases of AGE and SARI from the same geographical locality in one week period.

Reporting Status

Out of 66 functional EWARS sentinel sites, report was received from 38 sentinel sites (58 percent) whereas 28 sentinel sites did not report in 15th Epidemiological week of 2018. The reporting coverage is decreased as compared to previous week.

1.1 Acute Gastro-Enteritis and Cholera

276 cases of AGE are reported in 15th epidemiological week of 2018. Among 276 cases, the majority of cases are from Kanchanpur (35 cases), Kapilbastu (28 cases), Bara (23 cases), Rupandehi (18 cases), Dolakha (18 cases), Achham (14 cases), Makwanpur (13 cases) and Panchthar (11 cases) district. The number of AGE cases reported in 15th week this year did not exceed the number of AGE cases reported in the same week last year (474 cases).

One death from AGE is reported this week from Koshi Zonal Hospital and the deceased was from Morang district. Four deaths from AGE are reported so far this year. Twenty deaths from AGE were reported in 2017.

1.2 Severe Acute Respiratory Infection (SARI)

169 cases of SARI are reported in 15th epidemiological week of 2018. The cases of SARI reported this week did not exceed the number reported in the same week last year (229 cases). Among 169 reported cases, the majority of cases are from Morang (24 cases), Jhapa (19 cases), Lalitpur (19 cases), Rupandehi (17 cases), Kathmandu (10 cases), Dhankuta (9 cases), Sunsari (9 cases), Dhading (5 cases), Palpa (5 cases) and Panchthar (5 cases) district.

One death from SARI is reported this week from Lumbini Zonal Hospital, Rupandehi and the deceased was from Sainamaina Municipality of Rupandehi district. 25 deaths from SARI are reported so far this year. Eighty two deaths from SARI were reported in 2017.

1.3 Enteric Fever

16 cases of Enteric fever are reported this week including 3 from Kathmandu, 3 from Lamjung, 2 from Baglung, 2 from Ilam and 2 from Jhapa district. No death from Enteric fever is reported so far this year. Three deaths from Enteric Fever were reported in 2017.

1.4 Malaria

No case of Malaria are reported this week. Ten cases of Malaria are reported so far this year. Ninety one cases of Malaria are reported through EWARS in 2017.

1.5 Dengue

No case of Dengue is reported this week. Ten cases of Dengue including one death are reported so far this year. 1201 cases of dengue are reported through EWARS in 2017.

1.6 Kala-azar

Five cases of Kala-azar are reported this week, 3 from BPKIHS, Dharan and one each from Koshi Zonal Hospital, Morang and United Mission Hospital, Palpa. The cases are from Jhapa, Saptari, Bhojpur, Morang and Palpa district.

Forty six cases of Kala azar including one death are reported so far this year. Two hundred twelve cases of Kala-azar were reported through EWARS in 2017.

1.7 Scrub Typhus

One Case of Scrub Typhus is reported this week from United Mission Hospital, Palpa and the case is from Mathagadhi Rural Municipality of Palpa district. Fifteen cases of scrub typhus are reported so far this year. 451 cases of Scrub Typhus were reported through EWARS in 2017.

Timeliness & completeness of reporting from sentinel sites:

Site Code	Sentinel Sites	Timeliness (This Week)	Completeness (%)	Site Code	Sentinel Sites	Timeliness (This Week)	Completeness (%)
101	Mechi ZH, Jhapa	On Time	100	135	DH, Sindhuli	On Time	100
102	Koshi ZH, Morang	On Time	100	136	DH, Illam	No Reporting	93
